
The Drinking Water Program (DWP) with support from Gradient Planning, is proud and pleased to sponsor this conference focused on emergency preparedness for water and wastewater systems. In the spirit of risk identification, assessment and mitigation, it addresses topics that are presently on your “radar screen” or that will be in the future. Come hear a variety of speakers share information critical to the future of your emergency preparedness program. And, come mingle with state and local drinking water, emergency management, and Homeland Security officials who will be attending. All of this in close proximity to your system operations!

REMEMBER!

Bring a copy of your emergency response plan(s) so you can reference it (them) during the session. There will be updates provided for the Emergency Response Handbook. If you have a plan in need of updating, or if you don't yet have one, you will still benefit from the exercise and the relationships established.
